

NOTICE OF REMEDIAL ACTION PLAN

**R. H. White Construction
41 Central Street
Auburn, Massachusetts
RTN 2-11865**

A Remedial Action Plan (310 CMR 40.0861) has been developed for this site pursuant to the Massachusetts Contingency Plan (310 CMR 40.1406). This disposal site was classified as Tier IC on March 30, 1999 and granted a Waste Site Cleanup Permit on August 18, 1999.

The Remedial Action Plan proposes the following measures to respond to a release of oil and/or hazardous material at this disposal site:

- **Monitored Natural Attenuation:** This alternative consists of the periodic monitoring of select groundwater wells for natural attenuation parameters. Monitoring would be conducted semi-annually for the first year and annually for the next four to nine years. Annual reports will be prepared providing an evaluation of the effectiveness of this alternative. There are no risks to this technology. If response objectives are achieved, benefits would include elimination of property value diminution, and risk to natural resources of the commonwealth.

M.G.L. c. 21E and the Massachusetts Contingency Plan provide additional opportunities for public notice of and involvement in decisions regarding response actions at disposal sites: 1) The Chief Municipal Officer and Board of Health of the Community in which the site is located will be notified of major milestones and events, pursuant to 310 CMR 40.1403; and 2) Upon receipt of a petition from ten or more residents of the municipality in which the disposal site is located, or of a municipality potentially affected by a disposal site, a plan for involving the public in decisions regarding response actions at the site will be prepared and implemented, pursuant to 310 CMR 40.1405.

To obtain more information on this disposal site and the opportunities for public involvement during its remediation, please contact Aimee Doherty, Project Scientist, at LFR Levine Fricke, 194 Forbes Road, Braintree, Massachusetts 02184 at (781) 356-7300.
