

# MEMORANDUM

Massachusetts Department of Environmental Protection  
Northeast Regional Office

**TO:** Bureau of Waste Site Cleanup  
205B Lowell Street  
Wilmington, Massachusetts 01887

**FROM:** Frank Ricciardi, PE, LSP

**DATE:** March 11, 2021

**SUBJECT:** Release Tracking Number (RTN) 3-36304  
BWSC105 Form - Section H.2. - Statement of Provisions Regarding MassDEP  
Approval of IRA

---

This memo provides the Statement of Provisions required for BWSC105 Form – Section H.2 included as part of the Immediate Response Action (IRA) Plan uploaded with Transaction # 1226619. The IRA Status Report is attached, as required, for BWSC105 Form Section B.06.

On June 3, 2020, in a telephone conversation between Frank Ricciardi, LSP for the City of Framingham, Thatcher Kezer, Chief Operating Officer for the City of Framingham, and MassDEP Emergency Response personnel Allison Williams, MassDEP approved the LSP's plan for fencing and placing signs around the area of concern with elevated lead in soil.

It should be noted that, although the comments regarding the approval provided by MassDEP in their June 3, 2020 BWSC101 Form (Release Log Form) discussed placing polyethylene sheeting on the ground in the area, LSP Ricciardi determined that the installation of polyethylene sheeting on the ground surface to prevent airborne dust was not feasible or necessary since the IRA area is wooded with mature trees and generally heavily vegetated. This determination was discussed with MassDEP during the above referenced telephone call with Ms. Williams.
