The Maritimes & Northeast Pipeline and Algonquin Gas Transmission Co. are proposing to build a new 26 mile gas pipeline and laterals in the coastal zone in Massachusetts (Massachusetts Bay and Boston Harbor). The purpose is to provide broad energy and environmental benefits to consumers in the Massachusetts and regional economy, in the form of greater availability of gas for residential, commercial, industrial, and electric power generation uses. **Comments on the proposed pipeline have been extended to July 2, 2002. Contact Jane Mead.**
