CONSERVATION LAND: Will the project involve the conversion of public parkland or other Article 97 public natural resources to any purpose not in accordance with Article 97?

- Yes (Specify _____) No

Will it involve the release of any conservation restriction, preservation restriction, agricultural preservation restriction, or watershed preservation restriction?

Yes (Specify _____) No

RARE SPECIES: Does the project site include Estimated Habitat of Rare Species, Vernal Pools, Priority Sites of Rare Species, or Exemplary Natural Communities?

Yes – Priority/Estimated Habitats PH 1302/WH 353 and PH 1295/WH 348 No
Vernal Pools 2661, 2662, 2659

HISTORICAL /ARCHAEOLOGICAL RESOURCES: Does the project site include any structure, site or district listed in the State Register of Historic Place or the inventory of Historic and Archaeological Assets of the Commonwealth?

Yes (Specify _____) No

If yes, does the project involve any demolition or destruction of any listed or inventoried historic or archaeological resources?

Yes (Specify _____) No

AREAS OF CRITICAL ENVIRONMENTAL CONCERN: Is the project in or adjacent to an Area of Critical Environmental Concern?

Yes (Wellfleet Harbor) No

PROJECT DESCRIPTION: The project description should include (a) a description of the project site, (b) a description of both on-site and off-site alternatives and the impacts associated with each alternative, and (c) potential on-site and off-site mitigation measures for each alternative (*You may attach one additional page, if necessary.*)

The proposed project involves the installation of approximately 11,200 feet of water main starting on Pole Dike Road at the intersection with Coles Neck Road, continuing along West Main Street to Main Street, along Bank Street, continuing south along Commercial Street and extending along Kendrick Avenue in Wellfleet. The water main is necessary to provide water to the downtown area of Wellfleet to comply with the Administrative Consent Order (ACO) dated May 2, 2002.

A portion of this project area is classified as an Area of Critical Environmental Concern (ACEC) but the construction activity will consist of the excavation of a 3' wide trench within a paved travel lane of the above mentioned route for the majority of the main line. In the area of Pole Dike Road Creek the water main will be installed using a trenchless method of directional drilling.

Once the construction activities are completed, any and all ground surfaces altered, whether paved or unpaved, will be restored to their original conditions with respect to contour, material, classification, and vegetation and shall have no adverse effects on water supply protection, flood control, storm damage protection, pollution prevention, or fisheries and wildlife habitat protection.
