This project involves the repair of portions of an existing permitted rock revetment. The revetment was constructed around 1984 and a major portion of the existing revetment is licensed under DEP License #6052. The current proposed repairs are to be in the areas where settlement has occurred as indicated on the plan. Approval for access over the Chequessett Yacht Club Landing shall be obtained prior to construction. The contractor shall take photographs of the landing at the Yacht Club and of the beach area of the repair site prior to the construction process. This will facilitate the required restoration of the access ramp and beach to pre-construction conditions. Upon completion of the repair work the contractor shall re-grade the beach to match the pre-construction profile. Any upland areas disturbed during the construction process shall be re-planted with vegetation indigenous to the environment. Any future maintenance required on the revetment shall be presented to the Wellfleet Conservation Agent as to the scope of those repairs.

The site is within the Wellfleet Harbor ACEC. No adverse impact to the beach from material or equipment is anticipated. The landing is used daily by local shell fishermen, and therefore equipment not in use must be stored so as not to block access.
