Re: Notification of filing an NOI for Long Pond

Anticipated date of submission: June 20, 2018

Proposed Project: This project seeks to control Phragmites along 3500 feet of the northwest shore of Long Pond with foliar spray of herbicide. The actual target spray area is 8.1 acres. The active ingredient glyphosate is proposed as the herbicide to be applied, with a citrus based additive to enhance herbicide attachment to target plants and penetration into those plants. For best results, the treatment will be performed once the Phragmites has matured and is storing food in the root system, with a target treatment period during late August to early September.

Reviewing Conservation Commission: Nantucket Conservation Commission, 2 Bathing Beach Road Nantucket, MA 02554. 508-228-7230. Open Mon-Fri, 9 AM-1 PM.

Copies of the NOI may be examined at the office or acquired electronically from the Conservation Commission or by contacting the applicant's representative, Water Resource Services at kjwagner@charter.net. See the Conservation Commission websites for the meeting schedule for exact dates and agendas, at <http://www.nantucket-ma.gov/326/Conservation-Commission>. It is expected that the hearing for this project will be held on July 11th.
