

NOTICE OF A REMEDIAL ACTION PLAN

**CLEAN CORP. SITE
229-231 MAIN STREET & 31 RUTLEDGE AVENUE
NATICK, MASSACHUSETTS
RTN 3-3672**

A **Remedial Action Plan** (310 CMR 40.0861) has been developed for this site pursuant to the Massachusetts Contingency Plan (310 CMR 40.1406). This disposal site was classified as Tier I on **August 6, 1997** and granted a Waste Site Cleanup Permit on **February 9, 1998**.

The **Remedial Action Plan** proposes the following measures to respond to a release of oil and/or hazardous material at this disposal site:

- Soil Vapor Extraction (SVE) is the selected remedial action alternative for soils at this Site. SVE has been effective at removing chlorinated volatile organic compounds (CVOCs) from soils at the Site.
- Groundwater Recovery and Treatment is the selected remedial action alternative for groundwater at the Site to contain and control the migration of CVOCs in groundwater.
- Pilot-scale tests may be conducted to assess whether implementation of in-situ chemical oxidation or nano-scale zero-valent iron will be conducted as a remedial action alternative for the CVOCs in groundwater.
- A Phase IV Remedial Implementation Plan will be developed for these alternatives.

M.G.L. c. 21E and the Massachusetts Contingency Plan provide additional opportunities for public notice of and involvement in decisions regarding response actions at disposal sites: 1) The Chief Municipal Official and Board of Health of the community in which the site is located will be notified of major milestones and events, pursuant to 310 CMR 40.1403; and 2) Upon receipt of a petition from ten or more residents of the municipality in which the disposal site is located, or of a municipality potentially affected by a disposal site, a plan for involving the public in decisions regarding response actions at the site will be prepared and implemented, pursuant to 310 CMR 40.1405.
