Yes (Specify _____) No

If yes, does the project involve any demolition or destruction of any listed or inventoried historic or archaeological resources?

Yes (Specify _____) No

AREAS OF CRITICAL ENVIRONMENTAL CONCERN: Is the project in or adjacent to an Area of Critical Environmental Concern?

Yes (Specify _____) No

PROJECT DESCRIPTION: The project description should include (a) a description of the project site, (b) a description of both on-site and off-site alternatives and the impacts associated with each alternative, and (c) potential on-site and off-site mitigation measures for each alternative (You may attach one additional page, if necessary.)

The proposed wetland crossing construction activities will consist of the installation of a paved roadway/driveway, double pipe culvert and utilities to provide access to the upland part of the property where the construction of a single-family dwelling is proposed. The work will also include wetland replication in accordance with a plan approved by the Conservation Commission. The wetland replication will be at a ratio of 1:1. Erosion control barriers will be installed along both sides of the access as well as on either side of the replication area.

The paved roadway will be limited to 18 ft. in width, the paved driveway to 10 ft., and the side slopes to 2:1 (instead of the 3:1 typical) to minimize the impacts of the crossing. There are no other means to access the uplands except crossing the wetlands, which has been confirmed by the Conservation Commission.
