Hello Rebecca,

I'm curious if any soil testing has been done within any of the testing radii. I am in the process of purchasing a property within radius 4 (41 Prospect Street) and have some concerns over the presence of PFAS within topsoil due to runoff and a high water table (24" below the surface). I'm hoping we may be able to speak and assist with these and other questions, or point me to someone who may.

Best,
Matt
