Hi Susan,

I have it. All future email correspondence will be sent to that email address.

Thanks,
Mike

Hi Michael,

I would like to confirm that you have my email address.

Susan Ryan
64 Bean Porridge Hill Rd

Westminster, MA 01473
617 750 7087
Sryan0116@hotmail.com

We are anxious for the filter installation as we have a horse and chickens who continue to drink the contaminated water. We are available at your convenience. I have not yet received the document that was mentioned below, thus I am following up to be sure you have the correct email.

Thank you kindly,
Susan

Dear Thomas and Susan,

We are reaching out so that you have our contact information. We are an environmental consulting firm working with MassDEP related the discovery of PFAS compounds detected in your water supply well. We will be continuing to have bottled water delivered to you. Please let us know if you need to have any additional water delivered during the regular scheduled delivery schedule. If possible, provide us a notice a couple of days in advance of when you will need more water so that we can arrange the deliveries. That said, if you are going to run out of water, call us and we will address it without notice. If we are providing too much water, let us know that as well and we will adjust deliveries. Over approximately the next two weeks we will be installing a water treatment system within your basement to treat the well water. The goal of the treatment system is to provide potable water through the well so that water deliveries are not a sole source and may not be necessary. For the work we will be doing, there will need to be an access agreement in place. That document will be provided in the near future.

Our office telephone number is 978-338-5541. I can be reached at extension 103 and our company President, Lawrence Lessard, can be reached at extension 102. Please feel free to reach out to us with any questions you may have.

Sincerely,

Michael Backunas
